To Whom It May Concern:

I am very pleased to recommend Benchmark Construction to you for your commercial construction needs. Benchmark Construction has built several bank branch offices for D. L. Evans Bank. In each case we are very satisfied with the finished building Benchmark constructed.

The D. L. Evans Bank building at 1600 S. Vista Ave. in Boise, built by Benchmark, was completed in a most professional, comprehensive, and cost-effective manner. We are very proud of it. The excellent quality of the finished building speaks for itself. The Benchmark team's communication and ability to work in concert with us throughout the project was outstanding. Excellent follow up occurred after completion.

As a financier of commercial construction projects in Treasure Valley, I observe that Benchmark routinely completes projects on time, as presented, and within cost guidelines. Benchmark is thorough and pro-active in its construction and in its co-operation with the clients, public departments and other parties. Benchmark produces a superior building product. I recommend Benchmark Construction, its management, and its construction teams to you in this regard.

Sincerely

James Renell
Vice President and Manager
D. L. Evans Bank
Vista Office, Boise
